ABOUT ME

I am a vocational high school (SMK) graduate with limited professional experience, but I am eager to develop my skills and build professional connections. I have a strong interest in IT programming and enjoy experimenting with simple IoT projects using the ESP32. I am adaptable to workflows and capable of working effectively both independently and as part of a team. Since graduating, I have been actively participating in webinars and programs to continuously hone my skills independently and stay up-to-date with the field.

EDUCATION

SMKS PGRI 3 MALANG 2023-2026

SMP ISLAM DRUJU 2020-2023

EXPERIENCE

PT.Hyperdata Solusindo - Web Developer

2024-2025

- Convert Ocr
You can extract text from uploaded images—such as document images—with the final output quality depending on the image's resolution.
- Design Figma
I am looking for references online to create a design in Figma.
- Ajax JQuery
I often use it for CRUD systems to simplify function calls and to align with the company's coding standards during my internship.
- Chunking Upload
To speed up the image file upload process compared to uploading a single full file, the chunking function splits the file into parts; once all parts are successfully uploaded, they are reassembled.

SKILL

- | | | | | |
|---------------|----------------|--------------|--------------|----------------|
| • Laravel | • CodeIgniter4 | • Ms. Office | • MySQL | • Next Js |
| • Ai Promting | • Python | • Tailwind | • PostgreSQL | • UI/UX Design |

LANGUAGE

- | | |
|-------------|----------------------|
| • Indonesia | • English (a little) |
